Cabinet Module
(Air version only)

Flexible Treatment Centres

1 & 2.

Over-Patient Holder type
(Electric and Air versions)

5 DELIVERY SYSTEMS

To enable the dental team to work with optimum efficiency.

CLESTA II: INTELLIGENT DESIGN

Clesta II's extraordinarily high levels of reliability and durability are supported by free extended warranties.

INTEGRATED CUSPIDOR

The Integrated Cuspidor is an attractive aseptic environment; the smooth surfaces and easily-detached bowl are designed to aid quick and efficient, hygienic cleaning. The glass bowl is extremely durable for longer lasting and continual use. The (CVS) solids collector is conveniently positioned for easy cleaning.

720S DENTAL OPERATING LIGHT

The smooth, balanced and compact operating light with Composite Curing Safe Mode setting for increased Operator efficiency. The unique sensor permits touchless on/off control. The Patient mirror is available as standard. Ceiling-mounted version also available.

ROTATION

The bowl rotates 180° providing ease of use for both the Patient and the Operator.

ASSISTANT'S CONSOLE

The Assistant's Console includes 3-way autoclavable syringe, vacuum and saliva ejector outlets. Easily positioned to enable two and four-handed operation. The easy-clean, hygienic soft-touch panel controls chair movements, cuspidor bowl and cup filler.

HEADREST

The Clesta II chair has a twin articulating headrest which allows the Operator to position the Patient's head correctly. It is equally suitable for both adults and children.

CENTRAL CONTROL PANELS

The panels incorporate membrane switches to control chair movements, cuspidor bowl flush and cup filler from the Operator's table. The surfaces are smooth, flat and very easy to clean. (Electric version illustrated.)

UPHOLSTERY

The chair offers super soft upholstery for perfect Patient comfort. The seamless easy-clean upholstery offers optimum hygiene levels and is available in various colours.

SPECIFICATION

Both Holder and Continental Rod type 'E' versions are supplied as standard with 3-way autoclavable syringe, 3 fibre optic outlets, micro motor and digital display.

CHAIR MOVEMENTS

Synchronised Axis Backrest ensures optimum Patient comfort at all times. Ultra slim construction allows ease of access for both Operator and Assistant. Two pre-set positions and Last Position Memory make the Clesta II chair simple to operate. A wide range of movement ensures a very practical working environment. The minimum seat height is 410mm, and maximum 790mm.
